

## Planned Wind Power establishment in the Barents Region: 25 000 MW

### Northern Norway

Finnmark	3117 MW
Troms	1352 MW
Nordland	4188 MW

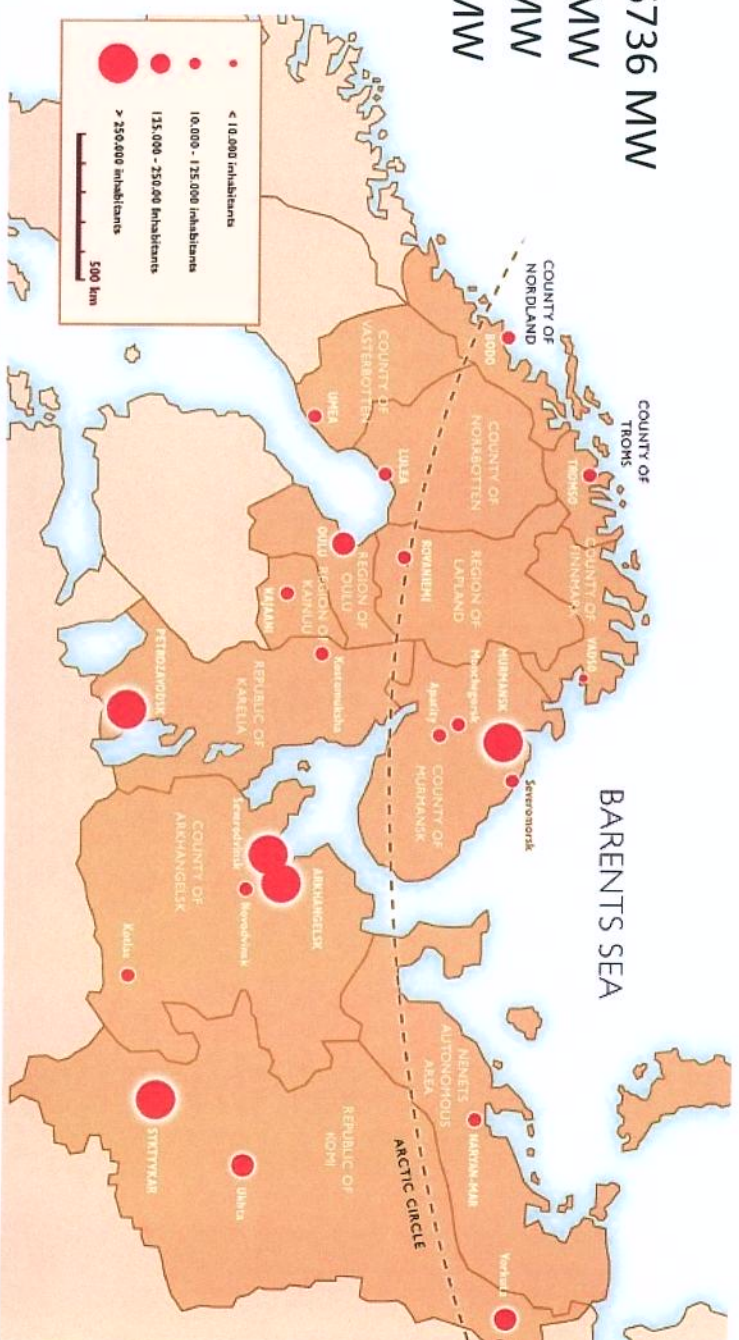

### Northern Finland

Lappland	1523-1883 MW
Kajanland	10 MW
Norra Österbotten	1602- 2691 MW

### Northern Sweden

Norrbottn	5093-6736 MW
Västerbottn	2 500 MW
Jämtland	3458 MW
Västernorrland	1 500 MW

The figures are based on the applications at the regional or lokal levels in each country.

## **25 000 MW in the Barents region means;**

- **Faster transformation to a renewable society!**
- **10 000 new jobs in the Wind Power Industry !**
- **New business for the Industry in the region !**
- **Strengthen research !**  
(Wind Power in Cold Climate)  
(Windpower in a forest country-side)
- **Establishment of new programmes for education !**
- **Conferences and new knowledge!**
